User chooses a quiz to take
 Users are asked multiple choice questions, answer them and are then given feedback
 Users are given a score at the end
 Users are ranked
 When users are given feedback, they are told the percentage of people that get that question correct

```
class User < ActiveRecord::Base
  has_many :answers
  has_many :quizzes, through: :answers
end

class Quiz < ActiveRecord::Base
  has_many :questions
end
